

▲ About

[Redhawk TMS](#) is a performance driven freight management service allowing you to streamline your freight shipping processes. We are a tech-enabled logistics company staffed by dedicated professionals, using the most current technology as a tool to react to the myriad of shipment events in today's shipping environment. Redhawk TMS a powerful, yet easy-to-use, freight management system.

▲ Benefits

Reduce Freight Spend

- Due to our shipping volume, highly discounted rates from multiple quality carriers are provided within seconds.
- Incorporate your own carrier contracted rates. Allowing you to quickly compare all available rates.
- Reduce/eliminate staffing associated with shipping customer service tasks.

Ease of Use

- Simply enter shipment weight & dimensions and freight class.
 - You receive multiple carriers' rate quotes in less than one minute
 - The carrier's performance quality scores are presented
- Choose the carrier rate you want to use.
 - Our staff will monitor and manage the shipment from dispatch through to delivery.

Quality Customer Service

- Accurate, timely shipment visibility to insure shipping performance.
- Provide comprehensive shipment status notification to all parties.

Streamline the Freight Audit & Payment Process. Stop Carriers from Overcharging.

- When using our carrier partners, we will pay freight charges on your behalf and provide one weekly billing statement for all shipments.
- We will audit for accurate billing and challenge all accessorial charges.

Current state of Logistics & freight costs:

- Logistics functions are under-staffed and experienced staff are difficult to find and retain.
- Supply chain disruptions are common requiring full-time management through delivery.
- Customers now demand more delivery notifications and increased shipment visibility.

Practical solution:

- The optimal solution is to outsource this "non-core" function to a Logistics Partner.
 - Reduce freight spend
 - Improve Customer satisfaction
 - Reduce/eliminate payroll
 - Provide shipping analytics & reporting to better manage your business
